

Safety Before Skill Swim School

Safety Before Skill – Booth #711

Safety Before Skill will be in Booth #711 at the Expo.

Safety Before Skill is focused on offering people of all ages a resource for learning how to swim in a goal-driven, technique-oriented, safe and fun learning environment. Positive reinforcement is the main motivation source used. Learning to swim is a critical life skill that can save your life. Our goal is to reach out and teach as many people as we can, including those with physical and mental challenges.

We share our love of aquatics and a commitment to drown prevention, with all ages and stages, by building relationships with each other as well as with the water, through private swimming lessons, aquatic fitness, and lifeguard certification and lifeguard rental services.

Booth Give Away:

We will be giving away 8 private lessons to one lucky winner. This is total value of \$329.60.
